Performance Test

Date	28 October 2026
Team Name	Harshika Jain
Team ID	EN25CS3010389
Project Name	Global Fuel Prices and Taxation Trends
Maximum Marks	

Project Performance Testing:

The project team shall fill the following information in the Project performance testing template.

S.No.	Parameter	Screenshot / Values
1.	Data Rendered	1 table (global fuel prices dataset) loaded with 10 fields: Country, Date, Income Level, Region, Subsidy Level, Brent Crude USD, Diesel USD Liter, LPG USD Liter, Petrol USD Liter, Tax Percentage. Records count and size: [add from Data Source tab]
2.	Data Preprocessing & Quality	Null check: missing values identified before removing any rows. Data type check: price columns confirmed as numbers. Standardization: Tax Percentage kept in one consistent format. No rows were deleted without checking.
3.	New Fields Created	No new calculated fields were created; Average (AVG) aggregation was applied to the price and tax measures.
4.	Filter Efficiency Test	Filters used: Country, Region, Income Level and Date (month). Dashboard updated correctly with each filter; the trend chart was limited to 3 to 5 countries to keep it responsive.
5.	Dashboard & Visualization Testing	No of Visualizations / Graphs - 9 Bar charts, line chart, map and scatter plot in one interactive dashboard.
6	Query History	Not applicable: the project was built in Tableau Public using a dataset file, so no Snowflake queries were run.
