Project Development Phase
Performance Test

Date	28 October 2026
Team Name	Harshika Jain
Team ID	EN25CS3010389
Project Name	Global Fuel Prices and Taxation Trends
Maximum Marks	

Project Performance Testing:

Project team shall fill the following information in model performance testing template.

S.No.	Parameter	Screenshot / Values
1.	Data Rendered	Global fuel prices dataset connected to Tableau Public (Data Source tab). Fields: Country, Date, Income Level, Region, Subsidy Level, Brent Crude USD, Diesel USD Liter, LPG USD Liter, Petrol USD Liter, Tax Percentage.
2.	Data Preprocessing	Checked that price columns are numeric and not text. Identified missing values before removing any rows. Checked the Tax Percentage format (0.20 vs 20) and used one format. Changed price aggregation from SUM to AVG for fair comparison.
3.	Utilization of Filters	Filters on Country, Region, Income Level and Date (month) on the dashboard. Measure Names filter limited to Petrol and Diesel in the comparison chart. Trend chart limited to 3 to 5 countries to keep it clear.
4.	Calculation fields Used	No custom calculated fields were needed. Aggregations used: AVG(Petrol Usd Liter), AVG(Diesel Usd Liter), AVG(Tax Percentage), AVG(Brent Crude Usd), with Measure Names / Measure Values and a trend line.
5.	Dashboard design	No of Visualizations / Graphs - 9 Bar charts, line chart, map and scatter plot combined in one interactive dashboard.
6	Story Design	No of Visualizations / Graphs - 9 Story points explain price comparison, tax effect, regional and income-level differences and the world map.
