Project Design Phase-II

Solution Requirements (Functional & Non-functional)

Date	29 October 2026	**Team Name**	Harshika Jain
Team ID	EN25CS3010389	**Project Name**	Global Fuel Prices and Taxation Trends

Functional Requirements

FR No.	Functional Requirement (Epic)	Sub Requirement (Story / Sub-Task)	Priority
1	Data Access & Integration	Connect to the fuel-price dataset containing Country, Date, Region, Income Level, Subsidy Level, Brent crude, petrol, diesel, LPG, and Tax Percentage fields.	High
2	Data Processing	Check data types, missing values, country labels, dates, and duplicate records; apply suitable cleaning without removing valid country-date records.	High
3	Business Analysis	Calculate appropriate average prices and tax measures; compare countries and regions; analyze trends over time and explore tax-price association.	High
4	Business Insights & Analytical Outputs	Provide country comparison charts, petrol/diesel comparison, time-series line chart, regional analysis, global price map, tax chart, and an interactive dashboard/story.	High
5	User Interaction & Analysis	Allow users to filter by region, date, and income level where available; use tooltips and map/chart selections to explore relevant data.	Medium
6	Data Update & Reporting	Refresh or reconnect the source dataset when updated; publish the completed Tableau workbook and provide its public link for review.	Medium

Non-functional Requirements

NFR No.	Non-Functional Requirement	Description
NFR-1	Usability	Use clear titles, readable labels, consistent colors, meaningful tooltips, and a simple dashboard layout.
NFR-2	Security	Publish only non-sensitive data; Tableau Public workbooks are publicly accessible, so check data permissions before publishing.
NFR-3	Reliability	Check calculations, null values, geographic matches, filters, and dashboard behavior before submission.
NFR-4	Performance	Avoid overcrowded charts and unnecessary marks; use appropriate filters and aggregation to keep the dashboard responsive.
NFR-5	Availability	Make the published Tableau Public workbook accessible through its shared link, subject to Tableau Public service availability.
NFR-6	Scalability	Keep worksheets and calculations organized so additional countries, dates, or fuel measures can be included when the dataset grows.
